

How to make PeKay's small box (Forest)

Size: 7 x 7 x 3.5 cms. (A4 Sheet)
2.6 x 2.6 x 1.3 inch (Letter Sheet)

1. Cut on the outside grid. Cut out the flower. This flower will be attached inside the finished box.

2. Use a stencil pen to trace the fold lines.

3. Turn it over and then fold at the lines to bring the edges together. That will make the smaller square.

4. Fold the left side to the center.

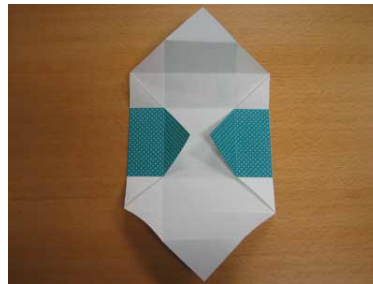

5. Fold the right side to the center too. Press the fold lines firmly, then open.

6. Do the same to the other sides.

7. Open them all. Now we are back at step 3 with the traced fold lines.

8. Open the top and bottom.

9. Make the left and right sides stand at a 90 degree angle. Then, make the top and bottom parts stand.

10. Be sure to make the angles to look like a box.

11. Fold the edges towards the bottom of the box.

12. Press the lines firmly to make the bottom of the box flat.

13. Do the same to the other side. Stick the flower inside the box, on the bottom. Now, you are finished.

This box is perfect for go-for-it stickers (Forest).
